Registration No: 25BCY10177

Branch: B.Tech CSE (Cyber Security)

Year: 1st Year

Course Code: CSE0001

Date: 28 March 2026

VIT University

Introduction

This project was assigned as part of the Digital Literacy course to help students understand and apply essential digital skills in real-world scenarios. As a Student Digital Ambassador, my role was to explore different aspects of digital literacy, including professional online presence, safe communication, and awareness of cyber threats.

Through this project, I learned how to create digital content, build a professional portfolio, and understand cybercrime risks. These skills are essential for both academic success and future career growth.

Task 1: Digital Literacy Awareness Infographic

I created an infographic using Canva focusing on three main pillars: what digital literacy is, safe internet practices, and professional online presence.

Task 2: Student Digital Portfolio

I updated key platforms like GitHub, LinkedIn, and Kaggle to build a professional identity.

Task 3: Coding & Collaboration Platforms

Used HackerRank and Google Forms for learning and collaboration.

Task 4: Email Etiquette & Communication

Focused on professional communication practices.

Task 5: Cybercrime Awareness

Learned about UPI fraud and phishing scams and adopted safer practices.

Conclusion

This project provided practical knowledge for academic and career growth in Cyber Security.
